ANDERSON AT FLYING WING IN PRACTICE

"Shag" Put Team Through
Strenuous Work-Out.

TIMMINS INJURED.

McGill Squad Prepares For
Game With Varsity Next
Saturday.

Returning to the gridiron after its victory over the M.A.A.A. squad on Thanksgiving Day, the McGill Seniors put in a strenuous afternoon yesterday under Coach Shaughnessy, and kept plugging away until long after dark, preparing for the big game against "Varsity," which takes place at Toronto next Saturday.

Captain "Dud" Ross, who suffered a crack on the knee in the game with the Winged Wheelers, was not present at the workout, and will most likely take training easy for a day or two yet. Don Baillie, former centre scrimmage, and more recently working at quarter, put in an appearance after being out for two weeks with water on the knee. Baillie did not get down with the team, but confined his workout to running around the track. Selby Cope, the Red and White flying wing, was also a side-liner. His shoulder is still stiff from the wrench received at practice the latter part of last week, and it is not anticipated that he will be able to get around in time to take part in the "Varsity" classic.

Several changes were noticed in the line-up used by "Shag" at training yesterday afternoon, chief among which was the appearance of "Boo" Anderson at flying wing. Normie Wallace held down the quarter position, and Ambridge went over to right middle, working alongside big Jeff Notman. The two hefty Red and White line-men made a formidable looking pair as they got down together on the same side of the scrimmage. Parsons, Timmins and Livshin were at scrimmage, while on the left side Gamble and McGregor held down the inside and middle berths. Parkins and Gordie Nicholson were at their usual positions at outside. On the half line were Russell, Wilson and Flanagan. Spares included Lafoley, Fitzgerald, Lazier, Philpotts, "Bones" Little, and Gord. Murphy.

Leo Timmins hit a snag towards the end of the practice when he wrenched his knee and had to be hustled off the field. It is not thought that the injury is bad enough to keep the plucky centre scrimmage out of the big noise next Saturday.

MCGILL HARRIERS HOLD INITIAL RUN

Fifteen Men Turn Out Making
the Distance In Good
Time.

Training in earnest for the Inter-collegiate Harrier race, which is scheduled to take place at Toronto on November 13, sixteen members of the McGill Harrier Club turned out yesterday afternoon and engaged in a fast run around the Serpentine, covering the four miles in excellent time. Most of the runners finished strong, and showed themselves to be in good condition already for the big annual event. Of the few who fell out on the road all were men who are just starting in on their training, but who will have plenty of time to get into shape for the University cross-country run, which it is expected will be held at McGill about November 6, at which time the Red and White representatives for the Intercollegiate will be chosen.

Those in the road run yesterday included: E. G. Bishop, W. A. Madonagh, J. C. Simpson, S. P. Findlay, C. E. Creelman, J. B. Ross, H. O'Hagan, J. C. Antliff, N. Egg, A. O. Leslie, D. W. Willoughby, H. Bustin, G. E. Elkington, J. Webster and Desbarats. Other members of the club, who are at present with the track team but who will be out later with the harriers are: R. E. Legg, W. C. Antliff, R. L. Hamilton, A. V. Palmer, and G. R. Stephens.

Biting cares do not disperse other-wise than by vessels of wine.—Horace.

What's On

TO-DAY

5.15 p.m.—Band practice at Union.
5.30 p.m.—Maritime Club meeting.
7.30 p.m.—E. T. Executive meeting.
7.30 p.m.—Student Volunteers meeting.

8 p.m.—Maccabean Circle Smoker.

COMING

Oct. 21—Students Society meeting.
Oct. 21—Mandolin Club meeting.
Oct. 21—Dental Society meeting.
Oct. 22—Orchestra practice.
Oct. 25—Chess Club.
Oct. 28—Cercle Francais banquet.
Oct. 30—Queens at McGill.
Nov. 6—Varsity at McGill.

GYM. CLASSES TO OPEN ONCE MORE

Students Participating In
Competitive Sports Are
Exempt.

The physical education programme for the year is published below, indicating to first and second year men of the various faculties on what dates they will be privileged to take physical exercise in the old Molson Hall. Whereas in former years this hall has been a place of great mental torment to the student, it has now been transformed into an up-to-date Gymnasium, with showers below. The atmosphere of frantic mental activity is to be replaced by a combination of mental and physical activity. To the men included in the schedule below, who are not taking part in competitive sports, this is an opportunity which they are not permitted to miss. A healthy body is essential to maintain a healthy and vigorous mind.

Students who are not actively engaged in competitive work and who hold A, B, C or D category cards, are required to report to the Gymnasium, Molson Hall, Arts Building, as follows:

*First year Science, sections A and B—Wednesday, October 22, at 11 a.m.
First year Science, sections C and D—Friday, October 22, at 10 a.m.
Second year Science, sections A and B—Thursday, October 21, at 2 p.m.
Second year Science, sections C and D—Friday, October 22, at 2 p.m.

Commerce, first and second years—Thursday, October 21, at 11 a.m.

First year Arts—Friday, October 22, at 9 a.m.
Second year Arts—Thursday, Oct. 21, at 4 p.m.

First year Medicine—Wednesday, October 20, at 12 noon.

Second year Medicine (5-year course)—Thursday, Oct. 21, at 3 p.m.

Second year Medicine (6-year course)—Wed., Oct. 20, at 10 a.m.

*The Science Faculty has kindly interchanged the assignment of sections of A B and C D in Shop Methods at this hour, so that A B can attend Gymnasium; C, D doing Shops at 11, while A, B take Shops at 12 noon.

BASEBALL FANS.

Notice of the twentieth annual meeting of the National Association of Professional Baseball Leagues was sent out on Tuesday by Secretary J. H. Farrell. The convention will be held in Kansas City, Missouri, commencing Tuesday, November 9. The national board of arbitration will hold daily sessions during the convention.

TRAGIC DEATH OF MCGILL STUDENT

R. C. Overing, Arts '21,
Drowned While Canoeing.

The week-end brings to us the sad news of the death of a former McGill student, Reginald Clarence Overing, the third son of the Rev. R. J. Overing, pastor of St. Mary's Church. Young Overing started his Arts course in 1917, but had not finished his course, and at his death was employed by the Furness, Withy and Company, Limited.

Overing was spending a holiday at the summer camp of his friend, Mr. Herbert Smith. It appears that Overing went canoeing on the Mississippi Bay at 11 a.m. and failed to return for lunch. A search was made and about 1.30 p.m. the body was found floating in the water half a mile from the camp.

The funeral will take place from St. Mary's Church, corner of Preston and Rouville Streets, Hochelaga, at 2 o'clock to-day, and thence to the Mount Royal Cemetery.

PLAYERS FOR TENNIS TEAM ARE CHOSEN

Six Players Picked At Executive Meeting.

CROCKER CAPTAIN.

Team Leaves To-Night For
Toronto — Names Are
Announced.

W. F. Crocker was unanimously elected captain of the McGill Inter-collegiate team, at a meeting of the executive of the Tennis Club, yesterday afternoon. Crocker is the first man of the six chosen to represent the college, and has had considerable experience in handling teams and tournaments. The meeting went on to the business of discussing what men were to constitute the team. The merits of all players who had any chance whatever were carefully considered before a final decision was made, in order that all might be given a fair chance. It was finally decided that the following six men shall be the ones to go to Toronto this evening at 10.30:

Crocker
Wright
C. N. Ramsey
Bernard
Claxton
Ward.

It is probable that Crocker and Wright will play as No. 1 pair in the doubles, while Ramsey and Bernard will be No. 2 pair. These four men will also take part in the singles. Claxton and Ward will be ready as spares in case anything should happen to the other players. The tournament will start on the courts of the Toronto Tennis Club, on Thursday morning. This will allow the preliminary rounds to be finished off in good time, so that the finals will both be played on Friday. The teams which are taking part are: R. M. C., Queen's, Toronto and ourselves. Our executive are pretty much in the dark as to what kind of material our opponents have this year, but there is no doubt that the McGill aggregation is half as good again as it was last October.

The second round in the club tournament has been completed with the exception of two or three stray matches. The games in this round which have not been played must be finished up by 5.30 on Friday afternoon. The same conditions will apply as in the first round. If a member is present at the courts and ready to play, but his opponent does not turn up before the hour mentioned, he may take the game by default. Players are urged, therefore, to get in touch with each other and arrange to play off these games.

OPENING SMOKER THURSDAY NIGHT

Will Be Given Under Auspices Of Union House
Committee Thursday.

The first smoker as provided for by the Union House Committee will take place this Thursday night at 8.15 o'clock. This announcement was made at last night's session, and it is to be the first of several which will be held during the ensuing year.

President Copeland and his cohorts are busily engaged, rounding up a wealth of entertaining talent, so with a copious supply of French twist, cheroots and bubble pipes, a pleasant evening is assured.

Every professor and student is cordially invited, and it is to be hoped that all will be able to attend.

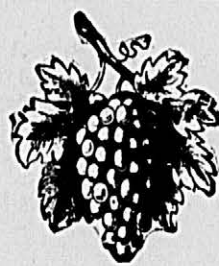

WEEK-END RUGBY.

Of the nine Valley teams that played Saturday, seven won their games and the other two lost. Missouri defeated St. Louis University by a decisive score of 44 to 0. Nebraska did not make so good a showing, being able to get away with the Colorado Aggies 7 to 0. Washington University playing Drury came out without being scored on, and managed to roll up 44 points. The Kansas Aggies rolled up the largest score against Camp Funston, 55 to 6. Ames fighting Grinnell got a victory by 25 to 0. Oklahoma playing her first game of the season beat Central State Normal 16 to 7. Drake went into the east and invaded Illinois but was turned back on a count of 40 to 0. Oklahoma, Drake and Grinnell were the only teams scored upon.

WEDNESDAY, OCTOBER 20, 1920.

TO-DAY'S MEETING

The semi-annual meeting of the Students' Society which takes place to-day should be attended by every undergraduate who is not ill or otherwise "unavoidably detained." We wish that we could be sanguine enough to prognosticate an attendance of five or six hundred, but sad experience has taught us that the chances are against such an assemblage.

For some reason or other, in the past, it has been the custom for a majority of the students to leave the matter of attending the semi-annual and annual meetings of their society "to the other fellow." There are cases on record of it being found necessary to postpone these gatherings on account of a lack of undergraduates sufficient to form a quorum. Surely this should not be!

The regular meetings of the Students' Society are held only twice a year and it is then, and then only, that the college men get a chance to see how the various forms of activity in existence on the campus are getting along, and how money paid over in the "universal fee" is being spent. Any man who tries to get through his course without paying any attention to such matters is not realizing the half of college life.

This year those who stay away have less excuse than ever they had. College activities are still "booming" under the influence of the post-war feeling of confidence. The registration is a record-breaking one, and the university with a new hand at her helm is entering upon a period of prosperity, it seems, such as it has never before known.

Let this afternoon see the big hail of the Union crowded with men who will listen intelligently to the account of student activities and who will be ready with plenty of questions if they see any need for enquiry. Questions are a sign of interest, and the more interest in these matters, the better.

PHILOSOPHERS MET ON THURSDAY, 14th

New Officers Elected—Programme For the Coming Session Discussed.

At a meeting held on Thursday the 14th in the Arts Building, the new officers of the Philosophical Club of McGill University were elected. They are as follows:—

Hon. President—Dr. W. D. Tait.
Councillors—Dr. J. W. F. Hickson and Dr. W. Caldwell.
President—L. F. Sperber, Arts '21.
Vice-President—J. Bruce Copland, Arts '22.
Secretary—M. H. Franklin, Arts '21.
Treasurer and Reporter—L. de H. Levinson, Arts '23.

The President and Secretary of the Club were re-elected, due to their past experience in handling its affairs, and also because the members present believed that the society would have the greatest success under their able management.

The President thanked those present for the honour bestowed on him in his re-election, and promised to do everything possible to assure the success of the coming year.

After the general meeting adjourned, the executive discussed the programme for the year, and it was decided that the student members should themselves provide the greatest part of the programme.

Different prominent names were mentioned as likely speakers, and it was decided to hold the first general meeting on or about November 9th.

R. V. C. NOTES

R. V. C. THE DANCANT.

Don't forget the girls out-door sports on Saturday, Oct. 23, at 2 p.m. sharp, on the R.V.C. grounds. There will be tea and dancing afterwards in the R.V.C. Splendid music, good floor—lots of dancing room. Tickets 75c.

PARTIALS.

The annual meeting of the R.V.C. Partial Society was held yesterday (Tuesday) afternoon. The chief business was the election of officers, of which the results were as follows:

Hon. Pres.—Miss Carr.
Pres.—Miss Beatrice Barnard.
1st Vice-Pres.—Miss Vera Eakin.
2nd Vice-Pres.—Miss Mary Russell.
Secy.—Miss Ruth Ayer.
Reporter—Miss Hope MacIntosh.
1st Year Rep.—Miss Betty Smith.
2nd Year Rep.—Miss Vera Eakin.

At the next meeting, which will be held very shortly, a larger attendance is hoped for.

DELTA SIGMA.

Every R.V.C. undergraduate is cordially invited to attend the first meeting of the Delta Sigma Society, to be held in the R.V.C. Common Room, at 3 p.m. sharp!

A "stunt" is being put on by each year, and judging from the mysterious preparations and secret rehearsals, the meeting promises to be a rare one, especially for Freshies.

Careless men let their end steal upon them unawares and unprovided.

The carrion which the eagle has left feeds the crow.—Latin Proverb.

ROOTERS' CLUB WANTS A BAND IMMEDIATELY

All Wind Musicians Required To Help.

PRACTICE TO-DAY.

No Talent Necessary—Come To Swell the Floods Of Noise.

The initial practice of the much-needed Rooters' Band will be held in the McGill Union exercise room, at 5.15 sharp. The leader, Chub Lebaron, hopes that every man who can play a wind instrument of any kind will be out to help along.

The need of a band was especially noticeable in Monday's game against M.A.A.A. The Rooters themselves yelled till all nearly broke down from inflammation of the larynx. They did their best, we will admit, but the absence of a band caused their songs to fade away like music on the desert sands.

Many men have signified their intention of being out, but there is room for everyone who plays an instrument. Anything from a tin whistle to a bass horn is needed. The band at present has ten men on its strength, but it will take many more than this to make enough music to be audible all over the stand.

Chub Lebaron has gladly taken over the leadership and organization, but without the assistance of every bandman student at McGill the band will not succeed.

In former years the Rooters' Band has been the backbone of the Rooters' Club. The old bass drum's boom-boom is just as necessary a keynote at a football game as it is at a circus. The grand march of Rooters to the field and the flourish of trumpets, coupled with the mad roars of the Rooters, are the things which fill our team with vigor and at the same time throw bombs of discouragement into the ranks of the opponents.

It is hoped that as soon as the band learns the old pieces and a lot of new peppery ones they have, that the Rooters' Club Band will hold their practices in the stadium stand. "Shag" is especially in favor of this, and claims that it is done all over the States. He holds that the players in practice need the aid of the Hoarse Marines to liven things up and also that the band practising with the Rooters will work towards a better brand of yelling at the big games.

The team are working their heads off, the Rooters are under way, and to-day's practice will show that the bandmen are also there with the bacon.

So all bandmen out at 5.15 sharp to-day, in the Union exercise room, and under the inspired leadership of "Chub," who himself blows no mean horn, everything should show up all to the mustard, and a band that will take a knock-out out of anything known around McGill heretofore is assured.

Let's so, bandmen. We look to you for a band that will make Sousa's Band sound like a burlesque from Faust.

All out! We will get you instruments, but every man who has an instrument of his own to play, please bring it along.

BANQUET GIVEN J. H. ROBERTSON

Member Of Law '21 Feasted At the University Club.

A very happy event took place last Friday night at the University Club, when a dinner in honor of J. H. (Hilarious) Robertson, Law '21, was given by several of his class mates. Mr. Robertson recently won the scholarship granted by the Provincial Government open to Law Students, and will sail for Paris at an early date.

In replying to the toast, the honored guest expressed regret that he was so soon to leave Old McGill, but added that the thought of eventually returning to our midst would bear him up through the ensuing lonely months.

Rare good fellowship prevailed throughout the dinner, all the old songs and yells being rendered with that elan and verve so characteristic of the class of Law '21.

Among those present were Dr. Norman Williamson, J. O. Gallery, E. L. Hibbard, Frank D. Genest, J. Kearney, Bill Nicholson, E. P. Dale, Harris, G. B. Foster, R. Benson, Frank McGillis, Jerry Anglin, E. R. McCall.

AMERICAN RUNNERS.

Cornell University's cross-country team of 10 men, scheduled to meet the combined teams of Oxford and Cambridge universities in England during the Christmas holidays, will leave New York December 14 aboard the steamship Aquitania, it has been announced. Coach J. F. Moakley will accompany the team.

NOTICES

THE MARITIME CLUB.

The first meeting of the Maritime Club will be held at 5.30 p.m. to-day.

After Tuesday night's rush, a pair of black boots were exchanged. Will the gentleman who has the wrong boots bring them to the Union where he will find his own.

LOST.

Slide rule, in Union, Tuesday morning. Owner's name on case and rule. Will finder kindly leave at Porter's desk in Union.

RINGS FROM MUSEUM.

Will the student who borrowed (?) two rings from the cases in the Peter Redpath Museum, one of which has been returned, please return the other ring at his earliest convenience.

STUDENT VOLUNTEERS.

The regular meeting of the Student Volunteers will be held to-night in Room B, Strathcona Hall, at 7.30.

BOOTH WILL LECTURE.

General Bramwell Booth, who is to lecture in St. James Methodist Church on Thursday evening, October 28th, is one of the constructive thinkers of the age. He comes to Montreal with a knowledge of world conditions in other parts of the globe, and in his lecture on "Lessons from My Father's Life," it is likely that he will have a message for every man who is prepared to do his bit in the era of peace.

STUDENTS' SOCIETY.

The semi-annual meeting of the Students' Society will be held this afternoon at five o'clock in the Union. The entire student body are expected to be present.

THE C.O.T.C.

The C.O.T.C. will parade at the High School, University street, at 7.30 p.m. to-night (Wednesday). It is important that all members and prospective members should be present at this parade in order that a definite allotment to the various training squads may be made.

MACCABAEAN CIRCLE.

The opening meeting of the Maccabaeon Circle of McGill University will be held in the form of a smoker this (Wednesday) evening, at 8 p.m., in the Red Room of the Fraternal Chambers, No. 1 Hutchison street, corner Sherbrooke. All members and students interested in its activities are invited to attend.

Nathan Gordon, K.C., will speak on "Memorah, and Its Relation to Student Life."

MANDOLIN CLUB.

A meeting of the Mandolin Club will take place at Peate's, 584 St. Catherine St. West, at 8 o'clock, Thursday evening. All men who can play the mandolin, drum, piano, etc., are earnestly requested to be present. The registration of new members will be followed by the election of officers.

LOST.

After Rugby game on Monday, at Stadium, Waltham watch with chain attached. Finder please communicate Uptown 1475. 743 University street.

CERCLE FRANCAISE.

The initial banquet of the Society which was to have been held to-morrow has been postponed until Thursday, October 28th.

E. T. EXECUTIVE.

The Executive of the Eastern Townships Club is requested to meet in the Reading Room of the McGill Union, at 7.30 p.m. to-day (Wednesday).

ORCHESTRA.

There will be a practice meeting of the Orchestra on Friday, 22nd, at 7 p.m. Work on the first concert programme will be commenced and all members are requested to attend.

LOST.

A self-filling fountain pen. Would finder kindly leave at office of "McGill Daily."

DENTAL NOTICE.

Dr. A. W. Thornton will address the Dental Society, Thursday, at 8 p.m. Every student is requested to attend.

MED. '26 OFFICERS, 1920-21.

President—A. G. Hill.
Vice-President—G. W. Chisholm.
Secretary—K. S. McLean.
Treasurer—J. K. Gouley.
Executive—W. Whidden, A. R. Glass and J. Harding.

NEWFOUNDLAND CLUB.

The second meeting of the McGill Newfoundland Club will be held in Strathcona Hall, on Friday, the 22nd, at 7.30 p.m. sharp.

Since the last meeting the executive has endeavored to get into touch with every Newfoundlander at McGill. This has incurred great trouble but it is possible some have been omitted by accident.

Whether you have heard from the executive or not, all Newfoundlanders will be heartily welcome on Friday. There are several important questions to come before this meeting, so come out in your thousands and just put

JUNIORS WILL MEET LOYOLA AT STADIUM

First Home Game Of the Season.

HOPES RUN HIGH.

Loyola, Defeated Once, Is Seeking Revenge.

McGill Junior Rugby players will engage in their third league match this afternoon when they meet the Loyola squad at the Percival Molson Memorial Stadium in the first home game that the third team has played this season. In the two preceding fixtures the Juniors have had little trouble in disposing of their opponents, defeating both Loyola and Macdonald on their own grounds, and with their own supporters cheering for them this afternoon are confident that they will just about clinch the titular honors in their section of the league.

While Loyola lost the last game to the Juniors, they are by no means downhearted, and latest reports from the Rugby lair of the Verdun de Grace team indicate that the squad is coming down to-day prepared to give the Red and White fourteen a hard battle.

McGill Juniors are showing excellent form this season, and are easily one of the best aggregations of third team players turned out by McGill in many years. Their work at practices has been a revelation to the ardent enthusiasts who daily cluster around the side-lines at the work-outs, and it is anticipated that a large crowd of spectators will watch this afternoon's proceedings to get a line on the Red and White Rugby prospects for future first teams.

The McGill squad will take the field for the game, which will commence at 2.15 p.m., as follows:

Flying wing, Mallison; halves, Pierce, Williamson, Whitall; quarter, Eddie Crain; outsides, Eason, Schwartzman; middles, Grant, Emo; insides, Puddicombe, Foss; scrum, Reid, Johnston, Evans, Spares, Donagan, Falconer, Carter, Layhew, Mitchell.

MANAGING BOARD SUFFERS ACCIDENT

Automobile Accident Might Have Proved Serious.

At present the Managing Board is short one of its most essential members. The Editorial Staff is bedily bent. In short, the Editor-in-Chief has gone A.W.L.

R. J. C. went down to Three Rivers to celebrate a well-earned holiday in a becoming manner. Craving a little excitement after the dull monotony of life as endured at Old McGill, he started for a golf course in full battle order, with a goodly supply of arms and ammunition, and with gas mask at that.

While shoving his jitney along towards the jumping off place at a minimum speed of thirty-five per hour, his anti-skids were called out by the Union and struck a telegraph pole. Not being a squirrel or a Ford, the old bus failed to make the grade, and a serious accident was narrowly averted.

At a late hour last night confirmation of the condition of the Editor was not forthcoming, but it is expected by friends in the city that he will be around again in the course of a day or so.

off that 8 o'clock "date" for half an hour.

Students who are not actively engaged in competitive work and who hold A, B, C or D category cards, are required to report to the Gymnasium, Molson Hall, Arts Building, as follows:—

*1st Year Science, sections A and B—Wednesday, Oct. 20th, at 11 a.m.
*1st Year Science, sections C and D—Friday, Oct. 22nd, at 10 a.m.

*2nd Year Science, sections A and B—Thursday, Oct. 21st, at 2 p.m.
*2nd Year Science, sections C and D—Friday, Oct. 22nd, at 2 p.m.

Commence, 1st and 2nd Years—Thursday, Oct. 21st, at 11 a.m.
First Year Arts—Friday, Oct. 22nd, at 9 a.m.

Second Year Arts—Thursday, Oct. 21st, at 4 p.m.
1st Year Medicine—Wednesday, Oct. 20th, at 12 noon.

2nd Year Medicine (5 year course)—Thursday, Oct. 21st, at 3 p.m.
2nd Year Medicine (6 year course)—Wednesday, Oct. 20th, at 10 a.m.

*The Science Faculty has kindly interchanged the assignment of sections A, B and C, D in Shop Methods at this hour so that A, B can attend Gymnasium; C, D doing Shops at 11 while A, B take Shop Methods at 12 noon.

FINAL TRIALS FOR TEAM MEN TO BE HELD

Regular Races and Complete Set Of Officials.

"VAN" IS PLEASED.

Many New Meds and Upper Year Men To Turn Out On Friday.

The final trials for candidates for positions on the Track team will be held at the Stadium on Friday afternoon. Any man at the college is allowed to enter the trials, which will commence about 3.30 o'clock in the afternoon. From the showing made in these trials, the final choice will be made of the team to travel to Toronto for the meet on the following Friday.

There will be a regular set of officials at the trials, and everything will be run off in fast time. All of the events that have been seen in the past two meets will again be seen, and it is expected that there will be some reversals over the decisions of last week in the University meet.

Some of the track men were not in condition for the last meet and could not show at their best, so that with the extra week's training they should be able to give a better account of themselves. In addition, there have been some men in the upper years in Medicine who are turning out for the first time this week, and some of these may show up well.

The Red and White team must fight,

and fight hard, to bring back another championship to McGill this year, and all of the candidates are training as faithfully as possible in order to be at the top of condition when they meet the squads from the Royal Military College, Quebec and Toronto, in the latter city. None of the men will concede an inch to the opposing teams unless they are absolutely forced to do so, and they have the spirit that wins.

The full squad worked out on the track yesterday afternoon, but none of them were out more than fifteen minutes, as they don't want to suffer from over training. If they are favored with good weather for the next week, they should be in as good condition as possible for this time of the year.

"Van" is well pleased with his team, and thinks, if they keep up the work they are doing at present, they should carry off the Intercollegiate honors. There cannot be any slackening in their efforts, however, as they will meet stiff opposition.

WHICH IS YOUR CLASS?

There have always been, and probably always will be two classes of students on the campus.

One is the kind that is forever criticizing, yet offers no new plan to replace the old. He is eternally tearing down the structure of student government and enterprise. He is the Bolshevik of the college. No good can come from his perpetual, malicious knocking.

The other is the one who fully believes that our officers are doing everything in their power to make conditions here better. He gives them his hearty support and shows his appreciation of their efforts. A new constructive suggestion is his form of opposition to some unfavorable plan.

All hail to this kind of student. He is the one who will put McGill on the map.

BRITAIN TO TEST AIRWORTHINESS

Competitions For Commercial
Aeroplanes To Establish
Standards.

When the business man thinks of taking a journey or sending a valuable consignment of goods by aeroplane he wants to feel fully confident that there will be neither damage nor delay. When an air transport firm—which need not necessarily be an aircraft building firm—attempts to draw up a programme of operations it must have accurate data relating to the capability of aircraft, and it must know what can be done in the way of insurance, and what it will cost.

For the first time in the history of aviation important measures are being taken to secure these ends. The foundations have been laid in the past few weeks, and it will soon be comparatively easy to refer any new aircraft proposition to a new development in the mechanics of flight, or a new air line—to unimpeachable authority.

Influence Predominant.

For what has been and is being done the world will one day recognize its debt to Great Britain, but whether Great Britain herself will reap the greatest advantage from it, as she might, remains to be seen; indeed, it depends upon many complicated circumstances and influences quite outside aviation.

The British Air Ministry, after the war, were in a position to exercise the predominating influence in the conference which shaped the international air convention and laid the foundations of air law in all countries. The Air Ministry are now holding competitions for commercial aeroplanes, and despite the limitations of the competitions they, at any rate, establish certain standards of performance for future reference, and determine a scientific basis for the measurement of performance. In addition, by requiring competing machines to fulfill the Air Ministry's conditions for the airworthiness certificates (the like of which has not been done by any other country), they establish a standard of structural soundness.

Aircraft Record.

And now there is Lloyd's, the great marine insurance corporation, after more than a year of conducting business in aircraft risks, inaugurating an aircraft record which will serve for aviation the same purpose that the shipping register serves for marine navigation. This, one may be sure, will be followed by the establishment of Lloyd's standards and classification of aircraft for the guidance of underwriters. And it is to be noted that already Lloyd's is becoming recognized as the international authority in aviation, just as it is in marine insurance. Its world-wide organization is being brought to the service of aviation. And it would seem that no other country can produce the like, for recently an attempt to do so in the United States met with no success, a result that might lead one back to some interesting speculations as to the causes of it.

The cost of insurance is naturally at present a far bigger item in aviation than it is in shipping, and a scientific method of fixing the rates must exercise a powerful influence in encouraging the good and in squeezing out the bad. It will inevitably discourage inferior work in England, and when Lloyd's establish their own classification will go far to stop foreign manufacturers from their present practice of sacrificing structural soundness or employing second-rate pilots in order to carry a bigger commercial load or show an earlier profit.

Reliable Data Secured.

Now the cost of air transport depends largely upon the life of the machine, and the amount of attendance it needs, and the useful load it

POLO PROSPECTS ARE EXCELLENT

Swimmers Are Showing
Championship Form In
Try-Outs.

In preparation for the opening double-header, which is scheduled to take place next Tuesday evening, the McGill Polo Club held another successful work-out at the Y.M.C.A. tank last night. The men are all showing exceptional form in both their shooting and team play, owing, no doubt, to the fact that the team has such men as Vernot, a swimmer who showed such form at the Olympic swimming events at Antwerp this summer, Fisk, the back-stroke champion of Canada, and holder of many prizes in swimming; Poss, an exceptional polo player aside from his prowess on the athletic field; Parsons, of polo and Rugby fame, who has figured on many champion polo aggregations. Aside from these, McGill has good men in Laidley, Bastable, Wade, Winters and Bruker. There are others who are showing great promise, and who will figure on one of the McGill polo teams this season. With plenty of support from the undergraduates, the McGill polo squad has a bright season ahead of it this year.

WHAT IS THE USE?

Once upon a time there was a young man who, having read his Plato and his Aristotle, decided with Pope that "the proper study for mankind is man." He therefore entered the service of his home town and for twenty years he worked hard and studied, in return for a wage about equivalent to that of a steam-fitter's helper. At last his efforts began to bear fruit; his dreams of community service materialized in the form of a great municipal undertaking destined to bring comfort and happiness to his fellow citizens. He persuaded the city council to authorize the undertaking, and at last the work was under way. So the man—no longer young—went forth upon the city streets to stretch his tired limbs and forget the cares of office. As he rested in the public park he overheard the idle talk of several fellow townsmen and the talk was concerning his great undertaking. He knew the work was good and so he listened, and this is what he heard about himself: "Clever duck! Wonder how much rake-off he got?"

Censure is the tax a man pays to the public for being eminent.

can carry for a given expenditure of fuel at a stated speed. It also depends upon insurance; and insurance rates are based upon liability to accidents.

Useful Facts Learned.

One test showed how many pounds machines can carry a certain distance at a certain speed for a given expenditure of fuel. Some of the machines proved that for each 18 pounds, or so, of commercial load on a journey of 280 miles they would burn a gallon of fuel. This is not at all bad; but already it could be far and away surpassed by the aid of the various high-lift wings—the Handley-Page, and the Alula, for example.

Broadly speaking, as a result of the tests it is now known (although more recently designed machines would do better) that an aeroplane carrying its full complement of passengers and sufficient fuel for a flight of 450 miles can fly at speeds up to 118 miles per hour and down to 55 miles per hour; fly uncontrolled for five minutes without upsetting; a two-engine craft can fly with either of the two engines idle without losing altitude or getting out of control; can come to a stop, even in a calm, after clearing a 50-foot obstacle in a length of 250 yards; can get off the ground with a run of 175 or 275 yards (according to type) and clear an obstacle 30 or 40 feet high.

MORE ABOUT ARTS '22 AT THE GAYETY

Class Reunion Unavoidably
Postponed.

SATURDAY NIGHT.

Arts Juniors Will Hold Their
First Class Function.

The past and present students of Arts '22 who expected to gather last night for a celebration of their return to College were unavoidably disappointed. It was deemed wise, in view of the short notice given, and on account of the unstable condition of the finances of many of the men, following so closely on the Thanksgiving holidays, to call off the party until Saturday night, the 23rd, without altering any of the other arrangements announced in the "Daily" last Friday.

The purpose of this re-union is to bring together all the members of the class who are in their third year Arts, as well as those who have switched to other faculties, or who have left College and are still in the city, in compliance with a resolution passed at the last meeting of the session 1919-20, asking for such a re-union at the beginning of the present academic year.

The evening, as announced, will take the form of a theatre party at the Gayety, followed by a "feed" at Childs'. In order that all arrangements may be made to ensure the success of the occasion, the executive requests all those who intend to be present kindly to leave their names with the janitor of the Arts Building before 6 o'clock Friday night. It is essential that this list be complete at that hour, if accommodation is to be secured.

The members of the class will meet at the Theatre itself between 7.45 and 8 o'clock Saturday night, and will take their seats in a body. The total cost of the tickets and meal will probably not exceed one dollar, or one dollar and a quarter. All expense over the dollar will depend solely on the capacity of the individual for food. The management of the Gayety informs us that accommodation will be found for thirty men. It behooves all who want to come to get their names in early. The others will be welcomed at the feed.

THEATRES

PRINCESS.

This week the bill at the Princess is characterized by exceptional variety. There is the melodramatic as well as a bordering on grand opera. "Songs of Araby" are well sung by Vernon Stiles, whose well-toned tenor voice is admired by all lovers of good singing. He sings "Dawning," "La Donna e Mobile," "If you never had a Beau," and "Your eyes have told me so." All of these were well rendered as only a good singer and a capable artist can do.

Miss Laura Pierpont and Mr. J. R. Armstrong display great gifts of humor in the sketch about a "golf" who left her happy home and went out into the unsympathetic world. The acting is well done by both actors and the appreciation of the audience was clearly seen. Then came Miss May West in a list of comic songs which always find a place on a vaudeville stage.

Harry J. Conley still retains his amusing way of entertaining his audience, whereas equilibristic feats are performed by the Becanos. Then come the Piano-Movers, funny and noisy, to retain the laughter and high spirits of all present. Frank Neville and Company supply amusement in a song and dance performance entitled "Miss Prohibition." Samartoff and Sonia also contributed their quota to the bill. These, with others, make the bill this week one of the best seen for a long time by the Princess theatre goers.

LOEW'S.

A good holiday bill, well up to the average of vaudeville production, attracted thousands to Loew's Theatre yesterday. Edna May-Foster has a surprise comedy act, the Foster part of the hyphen is the surprise. The team divide up the orchestra, Edna singing "Dardanella" and Foster singing "Tell me," simultaneously.

Henrietta Craig and Company present a sketch entitled "The Girl in the Dark," which is well up to the best standards of entertainment. Miss Craig as a pseudo-burglar is an excellent linguistic match for the policeman who is an entirely wrong clue when he pretends that every night marauder is a burglar. In "Buddies"—a melange of song, dance and syncope.

ROOTERS' CLUB SONGS & YELLS

1—YELL.

We're out for gore,
We're out for gore,
We're out for gore,
Keep her low,
Keep her low,
Keep her low,
Let her go
M—C—G—I—L—L

What's the matter with
Old McGill?
She's all right. Oh, yes,
you bet.

McGill, McGill, McGill,
Rah! Rah! Rah!
Rah! Rah! Rah!
Rah! Rah! Rah!
McGill.

2—HAIL, ALMA MATER.

Hail! Alma Mater, we sing
to thee praise,
Great our affection; tho'
feeble our lays;
Nestling so peaceful and
calm 'neath the hill;
Fondly we love thee, our
dear old McGill.

3—COME FILL YOUR GLASSES UP.

Come fill your glasses up
To McGill, McGill, McGill,
Come drink a loving cup
To McGill, McGill, McGill,
We will drink the wine to-
night,
Drink the wine that makes
hearts light,
Come fill your glasses up
To McGill, McGill, McGill.

Come sing a joyous song,
To McGill, McGill, McGill,
Sing as we march along
To McGill, McGill, McGill,
We will rally on the field,
We will make our rivals
yield,
Victory shall crown the
Shield
To McGill, McGill, McGill.

4—Tune — TAKE ME TO THE LAND OF JAZZ

Take me to the land of Jazz,
Let me hear the kind of
blues that Memphis had.
I want to step a tune that's

full of ginger and pep,
Pick 'em up and lay 'em
down,
Learn to do the Raz-ma-taz,
Let me give you a warning,
We won't get home until
morning,
Cause everybody's full of
Jazzbo
In the loving land of Jazz.

Tune—PUT ON YOUR OLD GREY BONNET.

Put on your Red and White
sweater
For you have none better,
And we'll open up another
keg of beer.
It is not for knowledge that
we came to college,
But to raise H— all the
year.

Aren't you ever coming
back
Montreal?
No never!
What! never
No never.

Tune of K-K-K Katy.

K-K-K Kootie,
Horrible Kootie,
Your the only, only bug that
I abhor,
But when the team goes
Over their dead line,
We will yell until we get a
Hundred more.

Tune — TAMMANY.

James McGill!
James McGill!
Peacefully he slumbers
there,
Blissful though we're on a
"tear."

James McGill!
James McGill!
He's our father, well yes,
rather,
James McGill.

LOCOMOTIVE YELL.

Give them the axe, the axe,
the axe, the axe, etc.,
Where!

Right in the neck, the neck,
the neck, the neck, etc.
McGill.

Rifferty, rifferty, riff, raff,
Chifferty, chifferty, chifi,
chaff,
Lets give them a cat call—
Meou.

When you're up you're up,
When you're down you're
down,
When you're up against the
Red and White
You're up side down.

I diddle I di
Give the dog a bone.
Hee Haw—Hee Haw
Haw, Haw.

There ain't no flies on us,
There ain't no flies on us,
There may be flies on some
of you guys,
But there are no flies on us.

Bing-bang, bing-bang, bing-
bang, bing-bang, etc.,
Coming down. Look out.
Bang.

You got to get that ball,
You got to get that ball,
You got to get that ball,
You got to get it.

Whiz-z-z
Bang
McG-I-L-L.
What's the matter with old
McGill?
She's alright. Oh, yes.
You bet.
McGill
McGill
McGill
Rah! Rah! Rah!
Rah! Rah! Rah!
Rah! Rah! Rah!
McGill.

Oh! Fiddlesticks.

We're the boys that make
no noise,
Ouh-ah, ouh, ouh-ah
McGill.

MARITIME CLUB TO MEET

Men From U.S., N.B. and P.E.I. Are Urged To Turn Out.

The first general meeting of the Maritime Club will be held to-day at Strathcona Hall at 5.30 p.m. At this meeting will be held an election of officers for the ensuing year. These include, president, honorary president, vice-president, sec-treasurer, and a representative from Nova Scotia, New Brunswick and Prince Edward Island.

Every man from the Maritime Provinces is urged to turn out and help elect a strong executive for his own club. This club is a strong factor in the life of every student, and to-day's business is too important to be left to the other fellow. The meeting will be short, and business will be disposed of as soon as possible.

So, all out, Maritimers, to Strathcona Hall, at 5.30.

NEW COURSE FOR ENGINEERS NOW

Opportunities For Trained Men In Big Positions.

There is at present, and there is likely to be for many years, a lack of men who can fill responsible positions in research work and in pioneer development in the great electrical companies such as the General Electric, Western Electric, Northern Electric, Bell Telephone, Marconi, and Research Institutes.

At the same time, there are enough men to fill the professorships in mathematics, or in physics, or in electrical engineering in the Universities of Canada and elsewhere.

Thus there is a great opportunity for young men of ability who receive proper training.

In particular, the development of the electron tube or thermionic valve has opened new fields in radio telegraphy and telephony, and in the so-called "wired-wireless," when radio frequency messages are added to low frequency signals on the same cables.

It is the duty of the Universities to train competent men to carry forward this work, and in particular to secure sufficient able men to fill the professional chairs, without which education and progress in Canada must be arrested. There is happily a determined effort to improve the financial status of Canadian Professors in the future.

The new course will be open to students in Applied Science who have completed their first two years and obtained first class standing in mathematics and physics.

It will also be open to students in Arts who have been distinguished in the honour courses in mathematics and physics after two years at McGill.

The course itself will be a judicious blend of the training in electrical engineering and in the honour courses of mathematics and physics.

Such a training is no new thing, for several distinguished men have already received it at McGill, such as Dr. L. V. King, Dr. R. W. Boyle, of the University of Alberta, who did such excellent work in Applied Physics, and Mr. E. S. Bieler, who has just gone to Cambridge with an 1851 exhibition.

The new course has now received sanction from the Corporation of the University, and there is no reason why suitable men should not begin their work at once.

It is understood that a B.Sc. may be granted at the end of the fourth year and an M.Sc. at the end of the fifth year, if a suitable thesis is presented.

Students wishing to enter the course may consult Professor L. A. Heald or Professor A. S. Eve in person or by letter without delay.

It is desirable that the schools of the Dominion and Province should train able boys in mathematics far beyond matriculation requirements, so that they can aid in the development of the enhanced requirements of Canada.

MEETING HELD LAST NIGHT OF RUGBYISTS

English Rugby Game Next Saturday.

FACULTY SUPPORT.

Intercollegiate Association Approved Of By Members Present.

At a well attended meeting of the English Rugby Club in Strathcona Hall yesterday, Lord Congleton was elected manager of the representative team, and W. N. Kemp was elected captain. The matter of local Rugby was discussed, and it was decided to form a three-team league and play a six-game series.

The three teams taking part in the series represent the West, the Maritime Provinces, and the third from the rest of the Empire.

J. Helmcken was elected captain of the Westerners, J. McIntosh of the Maritimers, and Lord Congleton of the Imperials. Each team is to play the others twice, and the winners expect to accept the hospitality of their opponents at a dinner or some other such suitable championship tribute.

Games will start next week on the old campus.

Prof. Matthews assured the members of the hearty support of himself and his Rugby enthusiastic colleagues on the Faculty.

As Queen's and Toronto Universities have Rugger teams, the matter of Intercollegiate Rugger was discussed and approved of.

The representative team is to play another match with the Montreal Club on Saturday afternoon next. It was suggested that should the Athletic Association care to stage the game at the Stadium, a good crowd would turn out and enrich the Athletic exchequer thereby.

The following men are asked to turn out on Thursday at 4 p.m.:

A Team	B Team
Helmcken...full back.....	Elderkin
McDougal...three-quarter....	Grooch
Day...three-quarter.....	Lawrence
Bradshaw...three-quarter....	Lea
Kelley...three-quarter.....	Kinsman
Dawson...three-quarter....	Ackman
Clarke...half-back.....	McNamee
McIntosh...half-back.....	Cooper
Lochead...forwards.....	Cleland
McLean...forwards.....	Blundell
Mitchell...forwards.....	Patterson
Crichton...forwards.....	Jones
Palmer...forwards.....	Trillo
Lawrence...forwards.....	Nellington
Dobson...forwards.....	Buchanan
Kemp...forwards.....	

The above men are asked to turn out or notify some other member of the club in order that their place may be filled. Prof. Matthews is going to give the halves and backs some well-needed advice and coaching.

BETTER RUGBY.

The best tackler on the 1920 'varsity football team at the University of Wisconsin will receive a trophy to be awarded by Prof. A. S. Pearce of the zoology department of the university. Professor Pearce is offering the trophy with the condition that the winner must be a man who sticks throughout the season.

Director T. E. Jones of the athletic department has selected as a committee of judges to pick the star tackler, Prof. J. F. A. Pyre, Prof. Warner Taylor, and Capt. J. S. Wood, professor of military science and tactics. This committee will watch the squad at the various games.

Many cares make the head white.

An unhappy man's cart is prone to tumble.

A poor cask often holds good wine.

—Latin Proverb.

BADGE RULES.

Every year there is some trouble about the use of non-regulation uniforms and crests about the campus and stadium. The trouble is only with the freshmen, who are ignorant of the regulations concerning the use of "foreign" badges.

It is only natural that the freshmen should be proud of the prep. school from which they have graduated, but, once they have become students at McGill, they are bound by regulation to wear no other crest but that of Old McGill.

The ruling concerning the use of badges is as follows:

"The promiscuous use of non-regulation uniforms and the wearing of 'foreign' badges on the campus, or at any University athletic contest, is prohibited, and if this offence be persisted in after due warning, such offender may be debarred from participation in University athletics until reinstated by the Athletic Association."

Wesleyan Notes

Wesleyan Theological College has resumed its session under very favorable circumstances. The election of officers for the Students' Council resulted as follows:

President—L. O. Bunt, Arts '21.
Vice-pres.—S. Edgecombe, Arts '23.
Treasurer—G. Hilton, Med. '25.
Social—H. M. Fife, Arts '21.
Athletic—C. F. Davis, Arts '22.
Devotional—T. Currants, Theo. '23.
Literary—C. N. Hetherington, B.A., B.D.

Following the inauguration of such a stately band of pilots, various subjects were discussed appertaining to the welfare of the college. It was unanimously agreed that J. H. G. Way, Law '23, be elected the reporter of the college for the "McGill Daily," and that items of interest be reported at reasonable intervals.

On Thursday, the 14th, the Sophs had their long-wished opportunity of initiating the newly-blessed Freshmen. The secrecy of the plans was amazing, and even the most astute mind had no idea what blizzards were approaching save the lordly cards of one year's residence. The Seniors and Juniors could not merely be on-lookers, but became real participants in the melee which always accrues near midnight from a Sophomore and Freshman meet.

The innocent Freshies were first taken to the Black Hole of Calcutta, where they were huddled in silence, each despairing of life, as the verdict of the powers that be was awaited.

From thence they were brought before the Judge, where penalties were rightly inflicted and allegiance was sworn to the household cat. Then the duty of a Freshman was explained, namely, the lifting of the hat when meeting his superior—the Sophomore—and the polishing of boots before breakfast. To these things the bewildered boys agreed, and, after serving a fruit supper to all present, were allowed to be led to their different rooms.

Already a committee has been appointed to arrange for a sociable in the near future, whereas the athletic phase of the college spirit is flourishing. To the residents of "Wesleyan," many enjoyable times are promised during the coming session, and the interest displayed among the students warrants success and good-fellowship.

WATER WAVE MIRACLE OPENS NEW CHAPTER IN APPLIED MECHANICS

Something like a sensation has been created in the technical world by the announcement that the lately discovered principle of Wave Power Transmission, which served great purposes in the war, has been applied with definite results of great potential magnitude to engineering operations.

A demonstration of the new science, as applied to mining, shipbuilding and other mechanical tools, is being made at the Dorman works at Stafford, England, and has been witnessed daily during the past week by a stream of engineers, press men, technical journalists and others.

Interest centred in the drilling of a block of the hardest Cornish granite by a drill driven by motor waves, carried at the rate of 5,000 feet a second through a flexible metal tube. The experiment was extended to other operations such as riveting, caulking and the like, with equal success, and it is claimed that a new era of untold possibilities in applied mechanics has dawned.

2,000 Bullets a Minute.

Up to the present five methods have been in commercial use for transmitting power. These are steam, and electricity, and the hydraulic direct mechanical, and compressed air systems. A sixth has now to be added which opens a new chapter in applied mechanics. This is the transmission of power by waves sent through water. A Rumanian, Mr. G. Constantinesco, discovered the method and applied it in the first place to aeroplane warfare. Associated with him in its application was Professor R. W. Boyle, of the University of Alberta, Edmonton. It was thanks to a synchronising device based on the principle of wave transmission that it became possible to send two thousand bullets a minute out through the propeller orbit of a fighting machine without risk of hitting the blades.

The Principle Illustrated.

What, then, is the principle of wave transmission? The conveyance of power depends upon utilizing the elasticity of the medium—most closely and conveniently, water through which energy is to be transmitted. Water was for long held by engineers to be practically incompressible, or at least its compressibility was regarded as having no commercial value. But water is compressible at high pressure, and this fact, so far from being negligible, is of the utmost importance, for upon this compressibility of water depends its power to transmit impulses in waves with phases like those of an electric current.

Perhaps the theory will be best understood by the analogy of the speaking tube. It is not, of course, the speaker's breath which travels until it reaches the ear of the listener, but the waves set up by the vibrations of the speaker's voice which move through the air medium. The air itself does not flow through the tube; all that happens to the air particles is that they are subjected to small movements to and fro about the mean position as the sound waves pass along.

Speed of Waves.

Somewhat similar is it with the waves which, as a result of momentary pressure at one end of a pipe, are made to pass through the water with which the pipe is filled. Arriving at the opposite end, these waves transmit to a yielding obstacle the momentum which they had originally received. It has been found that waves travel through water at about the same rate

INTER-FACULTY RUGBY GAME POSTPONED

Initial Games Of Series Changed To Saturday.

OCT. 23—A.C.L. vs. SCI.

With Exception Of First Game Schedule Remains the Same.

Owing to insufficient time to prepare for the first game of the Inter-Faculty Rugby series, which was scheduled to open this afternoon with a clash between the squads representative of Medicine and Science, the executive of the Rugby Club has decided to postpone the initial match of the league until Saturday, October 23, when the Science team will fight it out with a combined squad from Arts, Commerce and Law. The game between Science and Medicine, which nominally would have opened the series, will be played off last, and otherwise the schedule as at first announced will be adhered to.

The schedule calls for games on the Old Campus as follows:
Saturday, October 23, A. C. L. vs. Science.

Wednesday, October 27, Medicine vs. A. C. L.

Saturday, October 30, Science vs. Medicine.

Wednesday, November 3, A. C. L. vs. Science.

Saturday, November 6, Medicine vs. A. C. L.

Wednesday, November 10, Medicine vs. Science.

Only those will be allowed to play in the Inter-Faculty games who are not already members of the first three regular Rugby squads of the University. Owing to the late start made, it has been considered advisable not to hold Inter-Class games. All players in the Inter-Faculty series are reminded that it will be necessary to be medically examined before the first match if this matter has not been already attended to.

As the velocity of sound through water—that is, nearly 5,000 feet per second. In actual operation the water is confined under pressure in any length of pipe-line, which may be rigid or flexible or both combined, and may have any number of turns or kinks. At one end a piston actuated by a high-speed prime mover, such as a steam or internal combustion engine or electric motor, gives a rapid series of compressive blows to the water; the waves thus generated, quite independently of any flow of the water, pass along the pipe-line to the other extremity where there is another piston, one end of which receives the impulses, while its opposite end is connected to the rock drill or riveting hammer or whatever the tool may be.

Secure High Efficiency.

It is in rock drilling that wave power has found its first industrial application. Hitherto the compressed air method has been almost exclusively used for rock-drilling purposes on account of its safety for all mining work, as compared with electricity, and its handiness, as compared with other methods of transmission. But compressed air is admittedly a wasteful system. A very large proportion of the power is lost on the way. On the other hand, with wave transmission the efficiency is exceedingly high indeed. It is stated that the output with wave transmission is eight times the output with compressed air for the same input of power, and this means great economy in fuel. If all the wave energy is not utilized in a single generating action, a reflected wave travels back along the pipe-line and re-delivers its energy to the generating piston. And not only is there greater economy in power, but the cost of plant, outfit and tool maintenance is largely reduced with the new method, because the necessary plant and tools are smaller and more compact than in a compressed air installation. There are other advantages, such as the certain prevention of dust in the rock drill actuated by wave power, the provision of a constant stream of water at the drill point to clear away debris, and the general simplicity and fool-proof character of the working parts.

Resembles Electrical Transmission.

While the first use of wave transmission is for mining and shipbuilding and constructional iron work, where use is at present made of compressed air for the operating tools, it is likely also to find many applications in the driving of independent machines in workshops, in pumping of all kinds, in domestic heating, in direct transmission of power to the propellers or wheels of vehicles and craft of all sorts, and also in submarine work, for the appliances can be submerged without injury or disability.

It would be a bold man who put a limit to the possibilities of wave-power transmission, now that the theory and practice of it have become established, any more than to those of electrical transmission, which in some respects it resembles.

Seven Years In Style

The Kind Of Good Clothes To Buy For Long Wear

The R. J. Tooke Stores have the sole sale in Montreal of the Genuine Semi-Ready Tailored Clothes—with the price in the pocket.

Semi-ready clothes are sold in every large town in Canada—from Victoria to Halifax. The same price in the pocket prevails all over.

They are the sort of clothes that hold their shape and shade to the last gasp—and the style is good for seven years.

One well-dressed man visited a convention of designers this year, and boasted that the Semi-ready suit he had on was made for him seven-years before.—Adv.

OLD SCOUTS' CLUB WILL HOLD DINNER

Programme Of Work For Session To Be Outlined.

The Old Scouts' Club of McGill will begin its activities for the season on Saturday next, when its members are to attend a dinner party at the Union. The executive is in communication with a big scout speaker, and hopes in a few days to be able to announce him as the speaker of the evening.

Mr. R. Patterson will outline a course in boys' work and higher scout work that is to be carried on this winter in connection with the University.

To all that have been connected with the Scout movement, we would extend a hearty invitation to keep in touch with scouting matters by joining the Old Scouts' Club. Phone, write or call on A. B. Strong, G. B. Binmore, or J. L. Bieler in Science, or E. C. Amaron in Arts. See them before Thursday night. Only accepted members will be admitted to the dinner. It will take place at 6 p.m., Saturday, October 23rd, in the Union Grill. Good, Old Scout—is our password.

ECONOMICS AT KANSAS.

The Department of Economics of Kansas University is trying an experiment in the way of library courses this year. A new course in economics of agriculture for which three hours credit is given, is the experimental course.

No class recitations are held, but each of the students enrolled meets Professor Ise in conference, at times convenient to the instructor. All the assignments are library readings and each student can make a study of a particular subject in which he might be interested. Notes on readings are called for every few weeks, and at the end of the semester an examination will be given on the required readings.

Fifteen students of economics have enrolled in this course for this semester.

THOSE NIFTY CHAPS

Who have the rep among their fellows as always being dolled up to the nines

Not the lads who go around looking as though they couldn't stir for fear they'd break

But the regular fellows—the ones you like to know,

They're the lads who buy their haberdashery from us, for they know a good thing when they see it.
